INDEX TO *MODERN TRAMWAY* VOLUME 41 (1978)

Part I of this index contains **general subject headings**, but individual titles appear only where it would be impossible to trace a subject through Part II. **Part II** contains an **index of undertakings, country by country.** Place names are given their local form, but earlier versions or the English conventional forms are given in brackets where space permits. Alternative forms in use in bilingual countries are separated by an oblique stroke. Owing to pressure on space, some minor references have had to be combined under such headings as **museums** or **light railways**. Page numbers following the name of a country indicate a general article or reference.

* indicates a main article; § a map; page numbers in **bold** (mostly in Part II) **indicate illustrations.** The index has been compiled by Mr E. K. Stretch.
